PROJECTS

1. Clipkart Customer Services(Java, MySQL) (Team) (Lead Developer) Apr'23-May'23
 - Designed and implemented a robust Clipkart Customer Services System using Java with Swing framework for the user interface (UI).
 - Successfully integrated CRUD (Create, Read, Update, Delete) operations into the system, allowing users to efficiently manage product-related data.
 - Employed MySQL as the backend database to securely store and manage all system data, ensuring data integrity and reliability.
2. Blog WebApp (Node.js, MongoDB,Express.js) (Individual) (Developer) May'22 – Present
 - MongoDB's NoSQL database flexibility in tandem with Express.js for efficient routing, and EJS for dynamic templates, make for a robust and adaptable foundation to build a feature-rich blog website.
 - MongoDB, Express.js, and EJS form a versatile trio for a dynamic blog site.
 - With MongoDB, you can store diverse content types seamlessly, while Express.js simplifies request handling and middleware implementation, ensuring smooth user interactions."
3. Portfolio (HTML,CSS, JavaScript) (Individual) (Developer) Apr'22 – Present
 - Optimized website prioritizing performance and supporting both light and dark themes.
 - Implemented a Node.js and Express backend for a blog feature.
 - Developed a user interface with fundamentals of UI and UX in mind.
